You can help stop harmful pests and diseases in their tracks

Pests and diseases new to New Zealand can affect our business, industries, economy, and way of life on farms, orchards, forests, ports, or in your backyard.

This pest is
not in NZ and
we want to keep
it that way.

I'm about the size of a
10c
coin

The brown marmorated stink bug (BMSB) could infest homes, ruin gardens and crops, and destroy our fruit and vegetable industries. It stinks when crushed and is almost impossible to get rid of. BMSB can hitchhike in passengers' luggage and hide in cracks and crevices in imported goods.
